

Desktop Computer Model - LARGE (50 x 50 cm)

Closed 3D boxes, cut - fold - glue. Every glue tab shows the piece code.

You need

- Colour printer, 200-250 g/m2 card (or normal paper glued onto thin card)
- Scissors / craft knife, metal ruler, empty pen to score folds, glue stick + white PVA glue
- Base: cardboard or foam board 50 x 50 cm (5-10 mm thick)

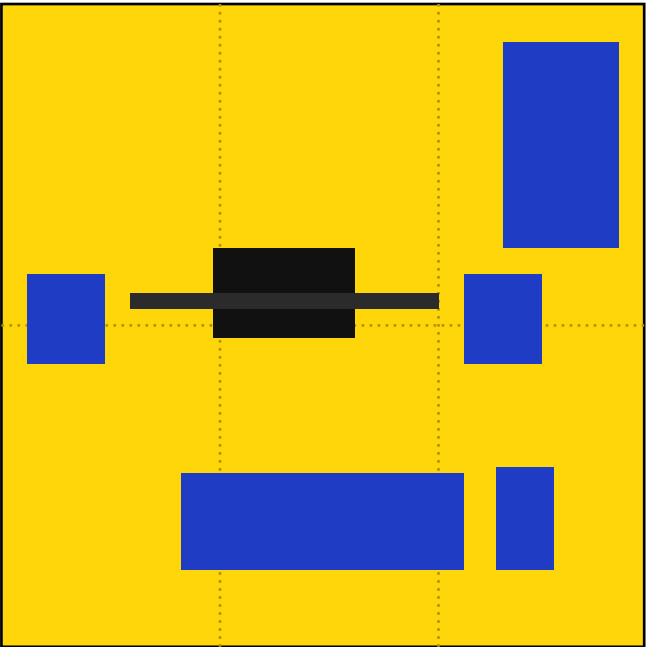

Pieces (code - piece - file)

A1..C2	Yellow base tiles (6)	01_base
E1..E8	Black base edge strips	01_base
T1..T6	PC tower: sides, front, back, top, bottom 9 x 16 x 20	02_pc_tower
M1, M2	Monitor screen + back with top wall 24 x 15 x 1.2	03_monitor
M3, M4, M5	Monitor bottom wall + 2 side walls	07_small_parts
S1, S2	Stand neck + foot top	04_monitor_stand
S3	Foot bottom	07_small_parts
L1, R1	Speaker walls (left, right) 6 x 7 x 11	05_speakers
L2,L3,R2,R3	Speaker tops + bottoms	05_speakers
K1 / K2	Keyboard top+walls / bottom 22 x 7.5 x 1	06_keyboard / 07_small_parts
U1 / U2	Mouse top+walls / bottom 4.5 x 8 x 1.3	07_small_parts
X1, X2	OPTIONAL RGB speaker fronts	08_optional

How to build

1. Print at 100 %. Check the 5 cm ruler at the bottom of each page. Cut SOLID lines, score + fold DASHED lines.
2. Grey tabs always go INSIDE. Fold every tab 90 deg first, put glue on the tab, then press the next panel on it.
3. TOWER: fold all tabs of T1 + T2 (sides). Glue T3 (front) and T4 (back) between the sides, then T5 top, T6 bottom.
4. SPEAKERS: close the wall strip L1 with its side tab, then glue L2 on top and L3 underneath (same for R).
5. MONITOR: on M2 fold the top wall + its tabs. Glue M3 (bottom wall) and M4, M5 (side walls) to the back, then glue the screen M1 on top of all the outer tabs. Keep it flat under a book while it dries.
6. STAND: close neck S1, close foot S2 with bottom S3. Glue the neck into the foot, then the monitor onto the neck's front face (dashed box on the monitor back).
7. KEYBOARD / MOUSE: fold walls down, glue corner tabs, then glue K2 / U2 underneath.
8. BASE: glue tiles on the board (A = left, C = right, row 1 = front). Wrap the black strips around the edges.
9. Glue every part on its dotted outline. Big boxes stay firmer with crumpled paper or a card cross inside.

Layout on the 50 x 50 cm base (top view)

Tiles: A B C = left to right,
row 1 = front, row 2 = back.

Back right: tower
Middle: monitor on stand
Left + right: speakers
Front: keyboard + mouse

Front edge = bottom of the drawing.
