

03 MONITOR screen box

Front = screen, the panel above it = monitor back. The thin black strips are the edges (0.8 cm).
Fold the 4 edges up, glue the small corner tabs, then fold the back down and glue on the 3 long tabs.
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.
