

Desktop Computer Papercraft Model

Blue PC set on a yellow board - A4 cut, fold & glue templates

You need

- A4 colour printer, thick paper/card (160-220 g/m2) - or normal paper glued onto cereal-box card
- Scissors or craft knife + ruler, a blunt point (empty pen) to score fold lines
- Glue stick / white PVA glue (or double-sided tape)
- Base: a piece of stiff cardboard or foam board, 38 x 27 cm

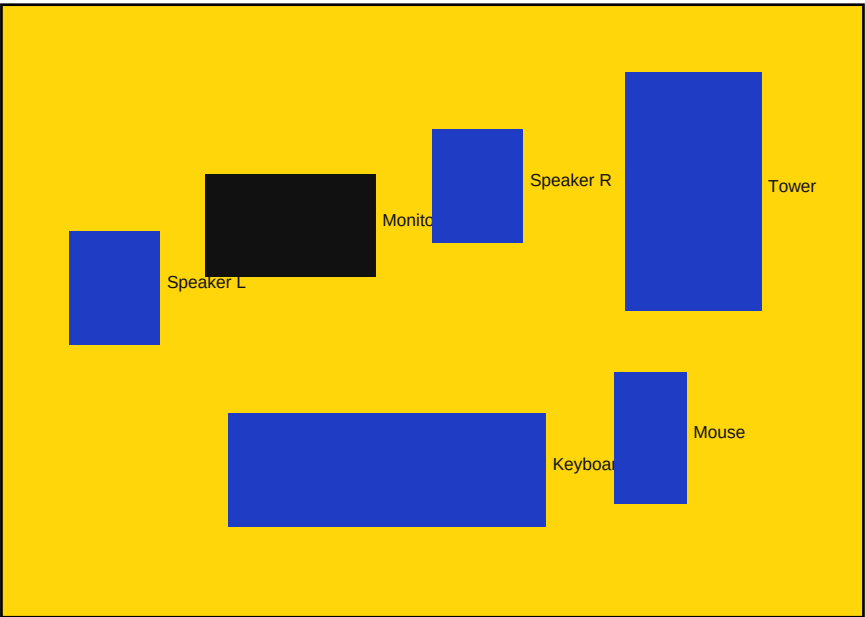

Parts list (finished sizes, cm)

01	Base board - 2 yellow sheets + black edge strips	38 x 27
02	PC tower - 2 sheets (piece A + piece B)	6 W x 10.5 D x 13 H
03	Monitor screen box	16 x 10 x 0.8
04	Monitor stand (neck + foot)	neck 6.5 H, foot 7.5 x 4.5
05	Speaker LEFT and 06 Speaker RIGHT	4 W x 5 D x 7.5 H
07	Keyboard + mouse	14 x 5 / 3.2 x 5.8
08	OPTIONAL: RGB speaker fronts (3rd photo style)	glue over speaker fronts

How to build

1. Print every page at 100 %. Measure the 5 cm ruler at the bottom of a page to check the scale.
2. Cut along SOLID lines. Score DASHED lines with a ruler and blunt point, then fold them away from you (printed side stays outside). Grey 'glue' tabs always go INSIDE the model.
3. Close each box: glue the side tab first, then the top and bottom lids. Hold 30 s until the glue grabs.
4. Tip: before closing big boxes (tower, speakers) put a crumpled paper or card inside to keep them firm.
5. Tower: glue piece A tab under the edge of piece B's back face, then piece B's tab inside the front face.
6. Monitor: fold the screen box, glue the neck to the 'glue stand' mark on the back, glue the neck into the centre of the foot. Lean the screen slightly back if you like.
7. Base: glue the 2 yellow sheets side by side on the cardboard (left + right). Wrap the black strips around the cardboard edges. Dotted outlines on the base show where each part stands.
8. Glue all parts on their outlines: speakers, monitor, tower, keyboard, mouse. Done!

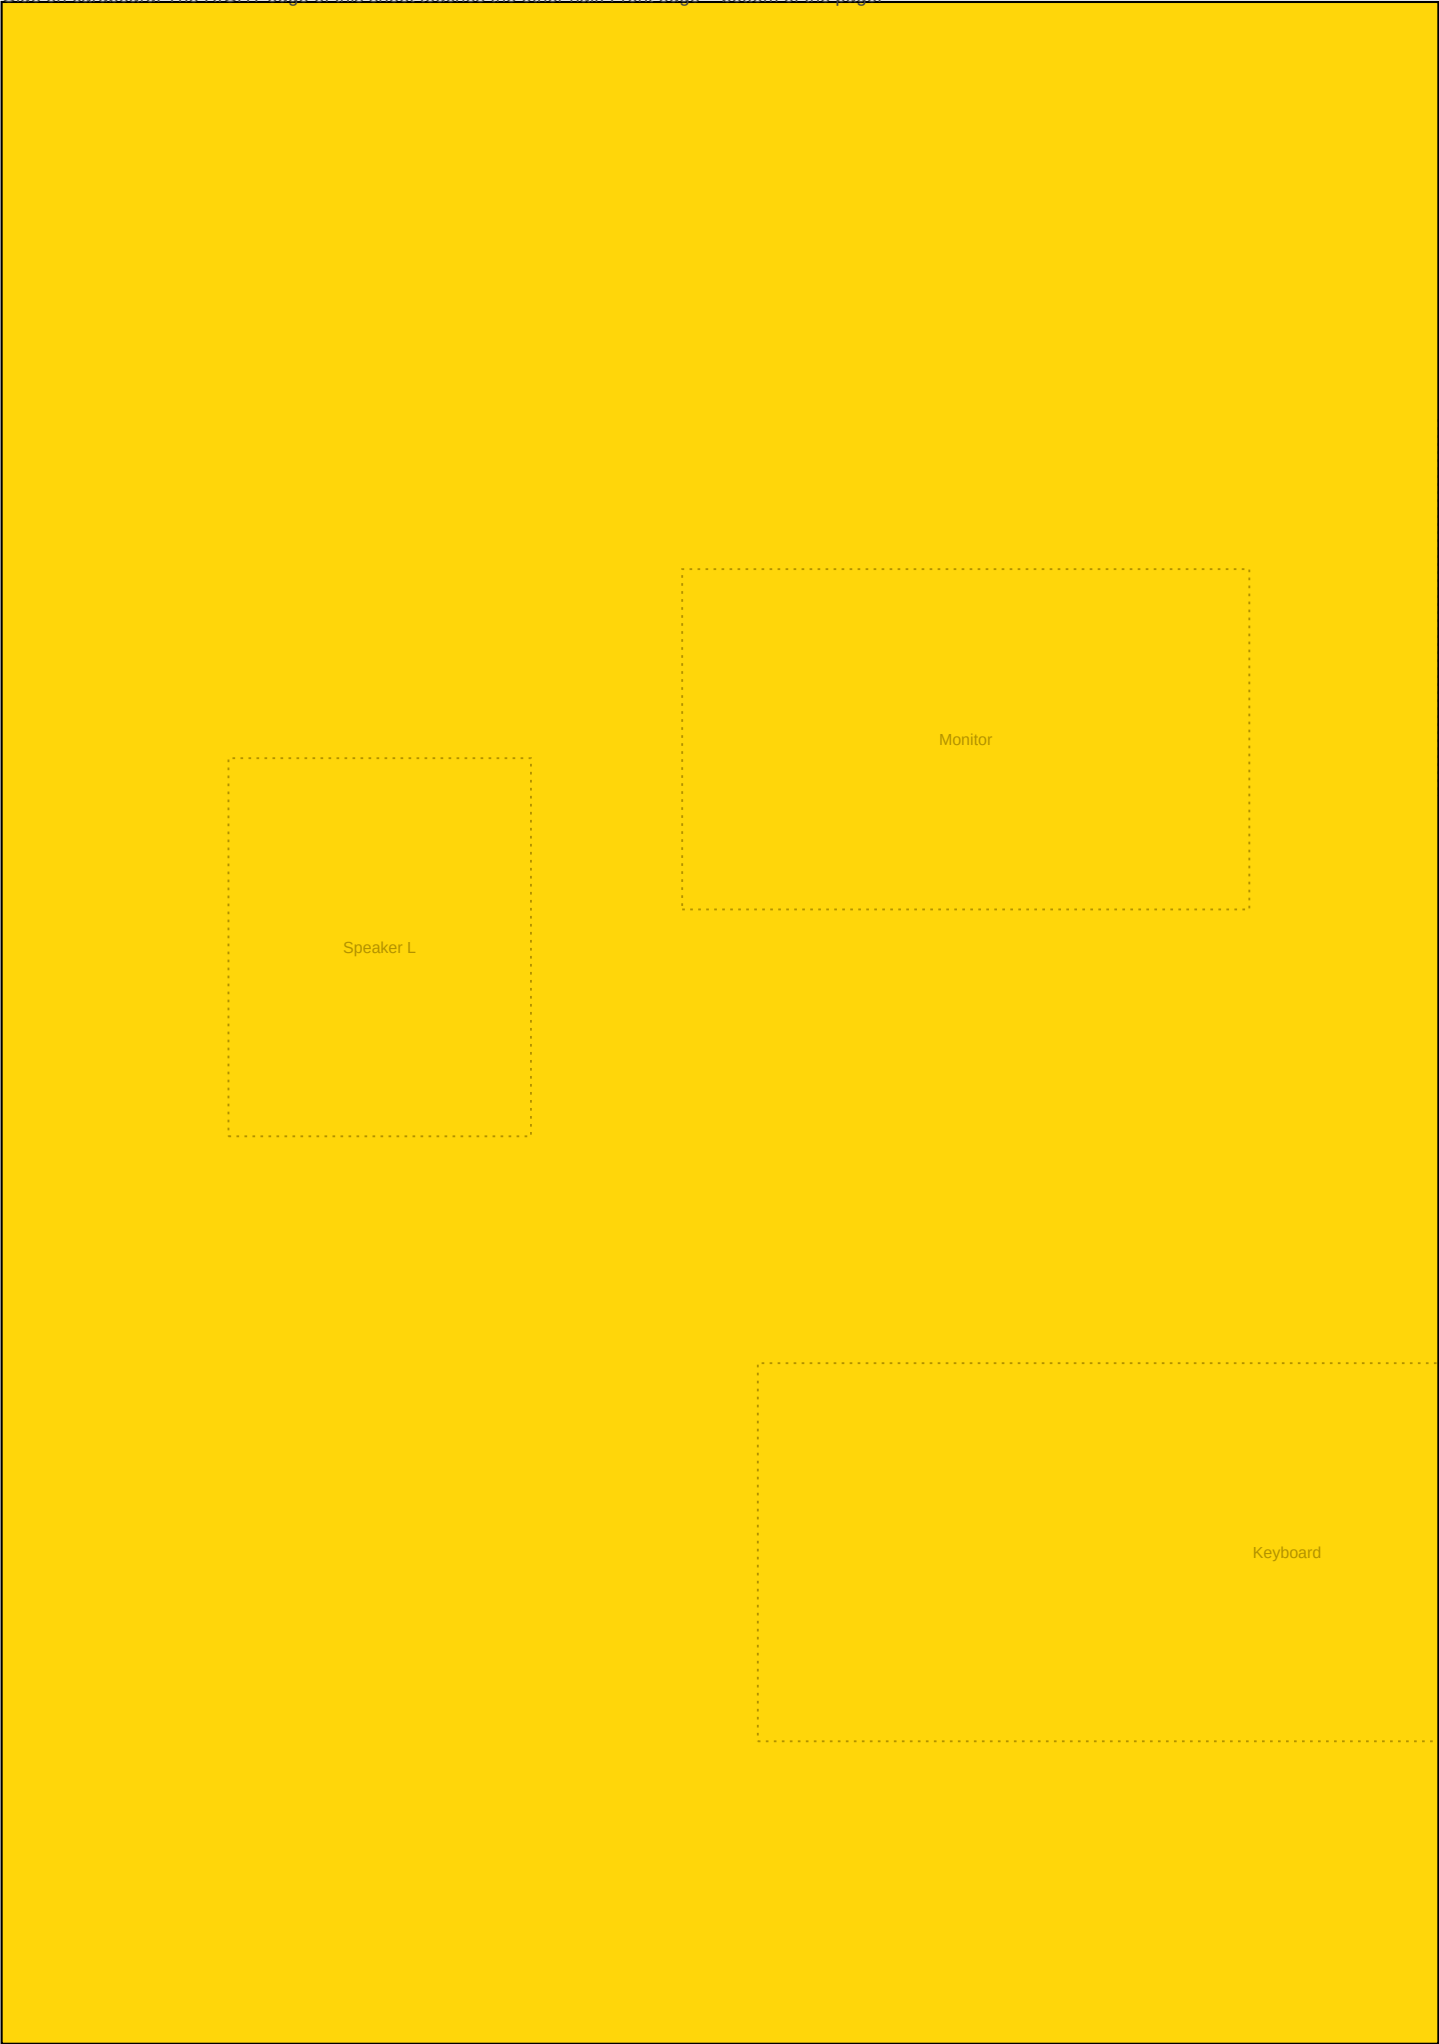

Layout on the base (top view)

front edge (you sit here)

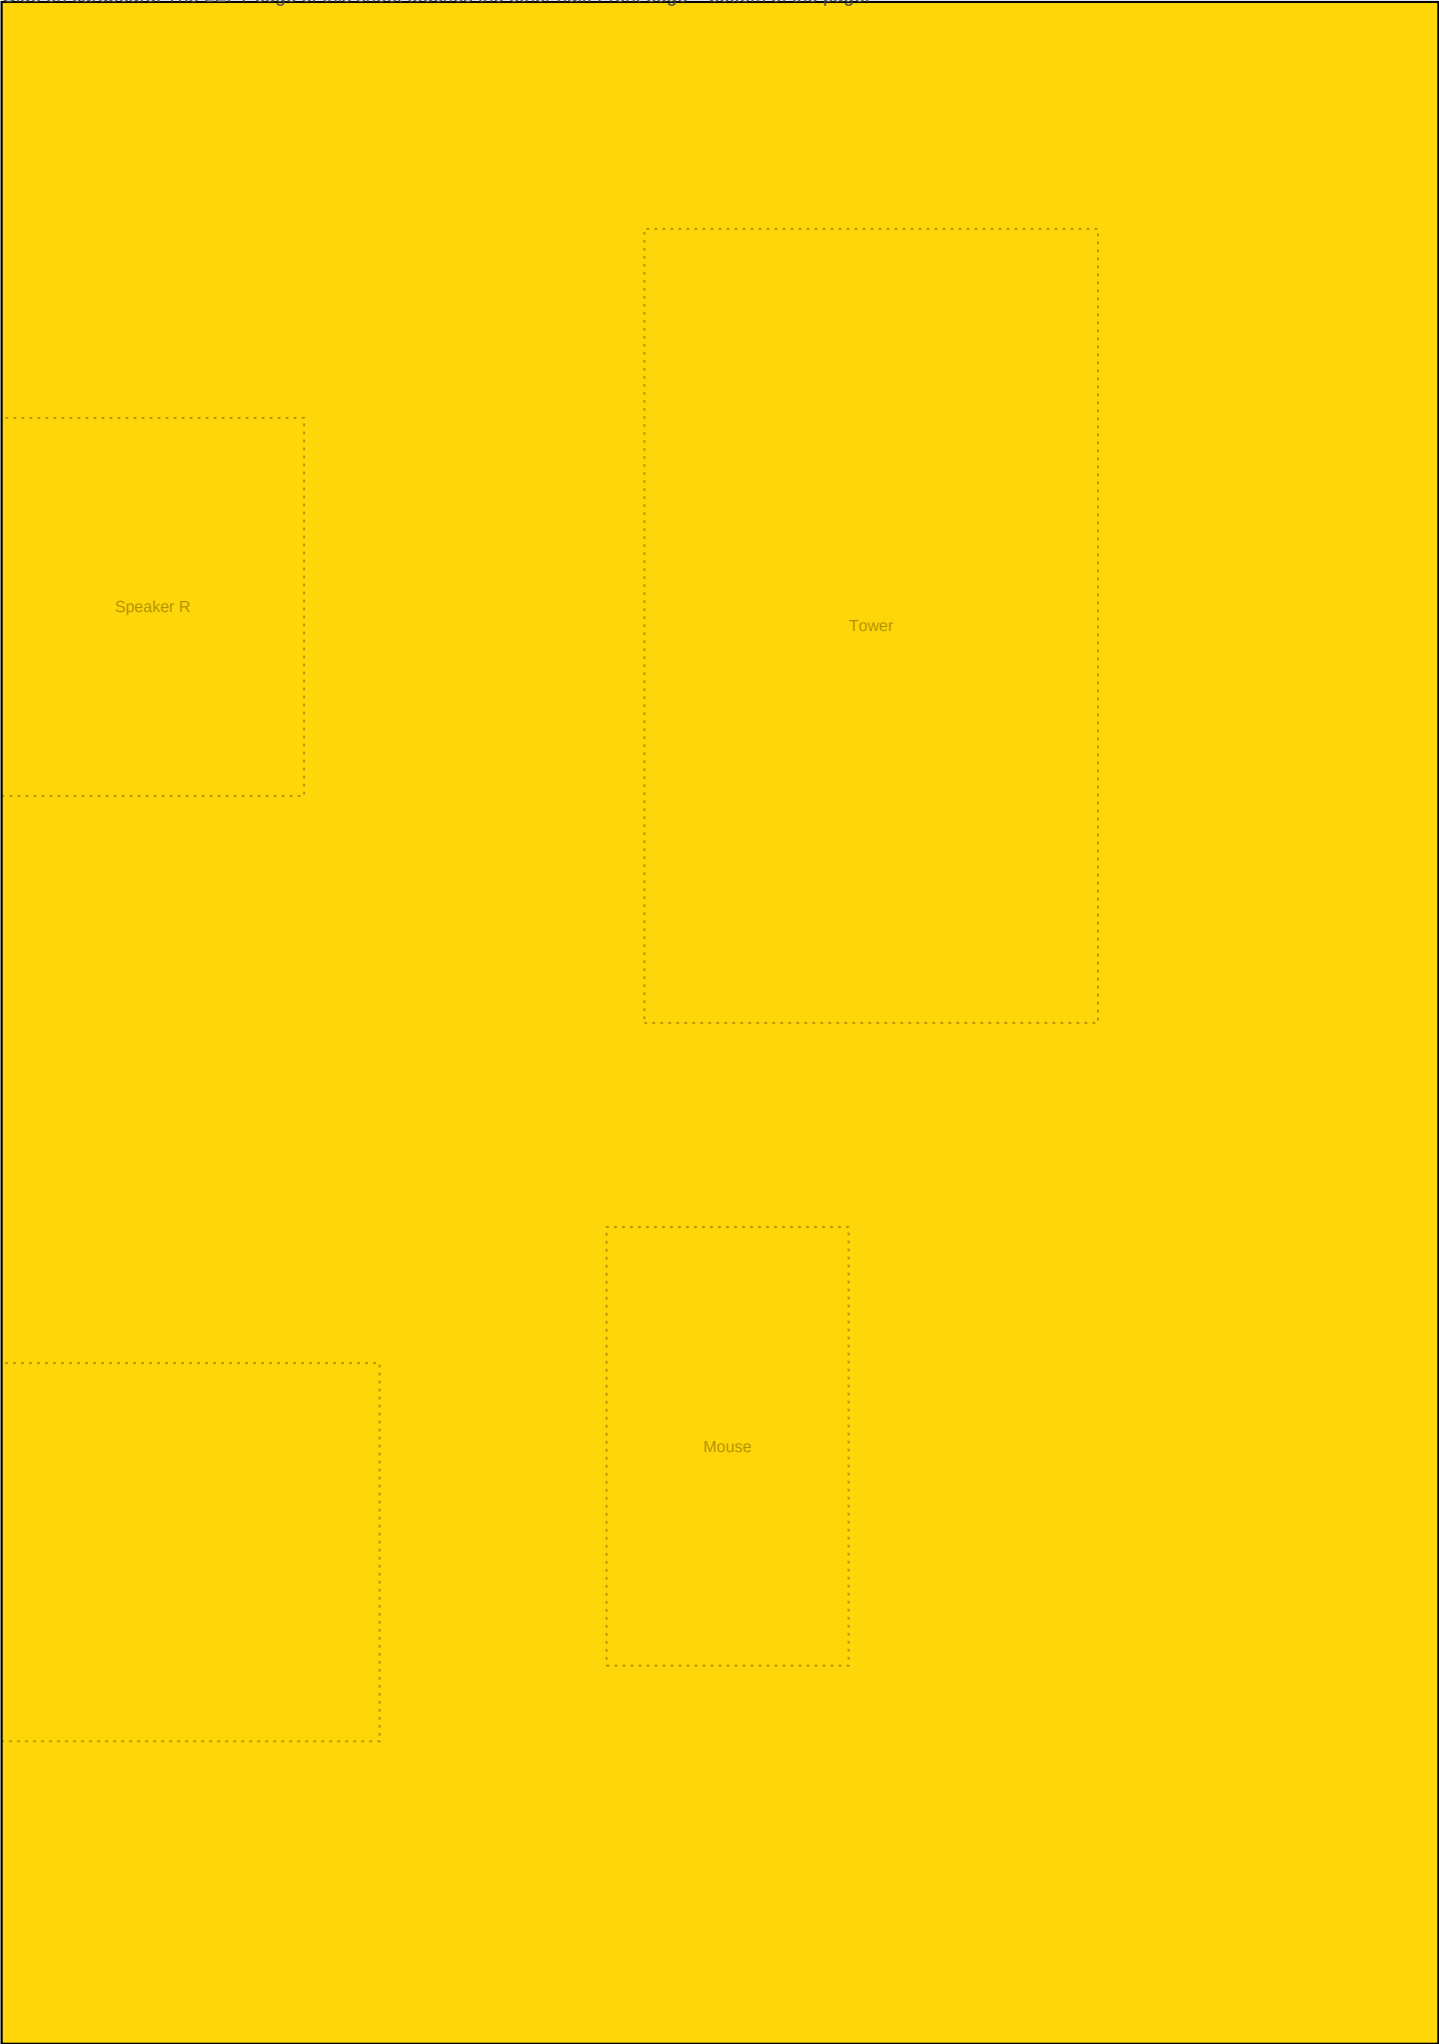

01 BASE BOARD - LEFT half (19 x 27 cm)

Glue on cardboard. The RIGHT edge of this sheet touches the other half. Front edge = bottom of the page.

01 BASE BOARD - RIGHT half (19 x 27 cm)

Glue on cardboard. The LEFT edge of this sheet touches the other half. Front edge = bottom of the page.

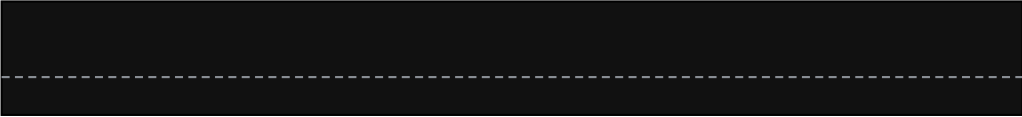

01b BASE BOARD - black edge strips

Cut out and glue around the cardboard edges (the black rim in the photo).
Strips are 1.5 cm wide: fold on the dashed line so ~0.5 cm wraps under the board.
Front + back edges: 2 x 19 cm each. Left + right edges: 2 x 13.5 cm each (= 27 cm).

back (right half)

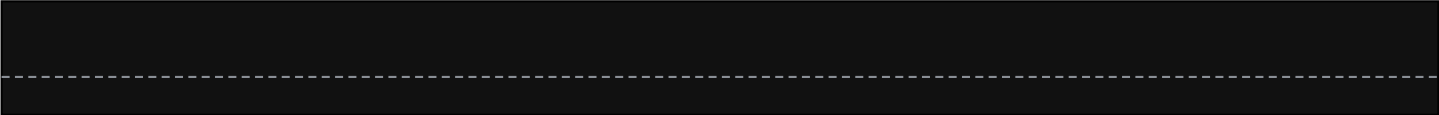

back (left half)

front (right half)

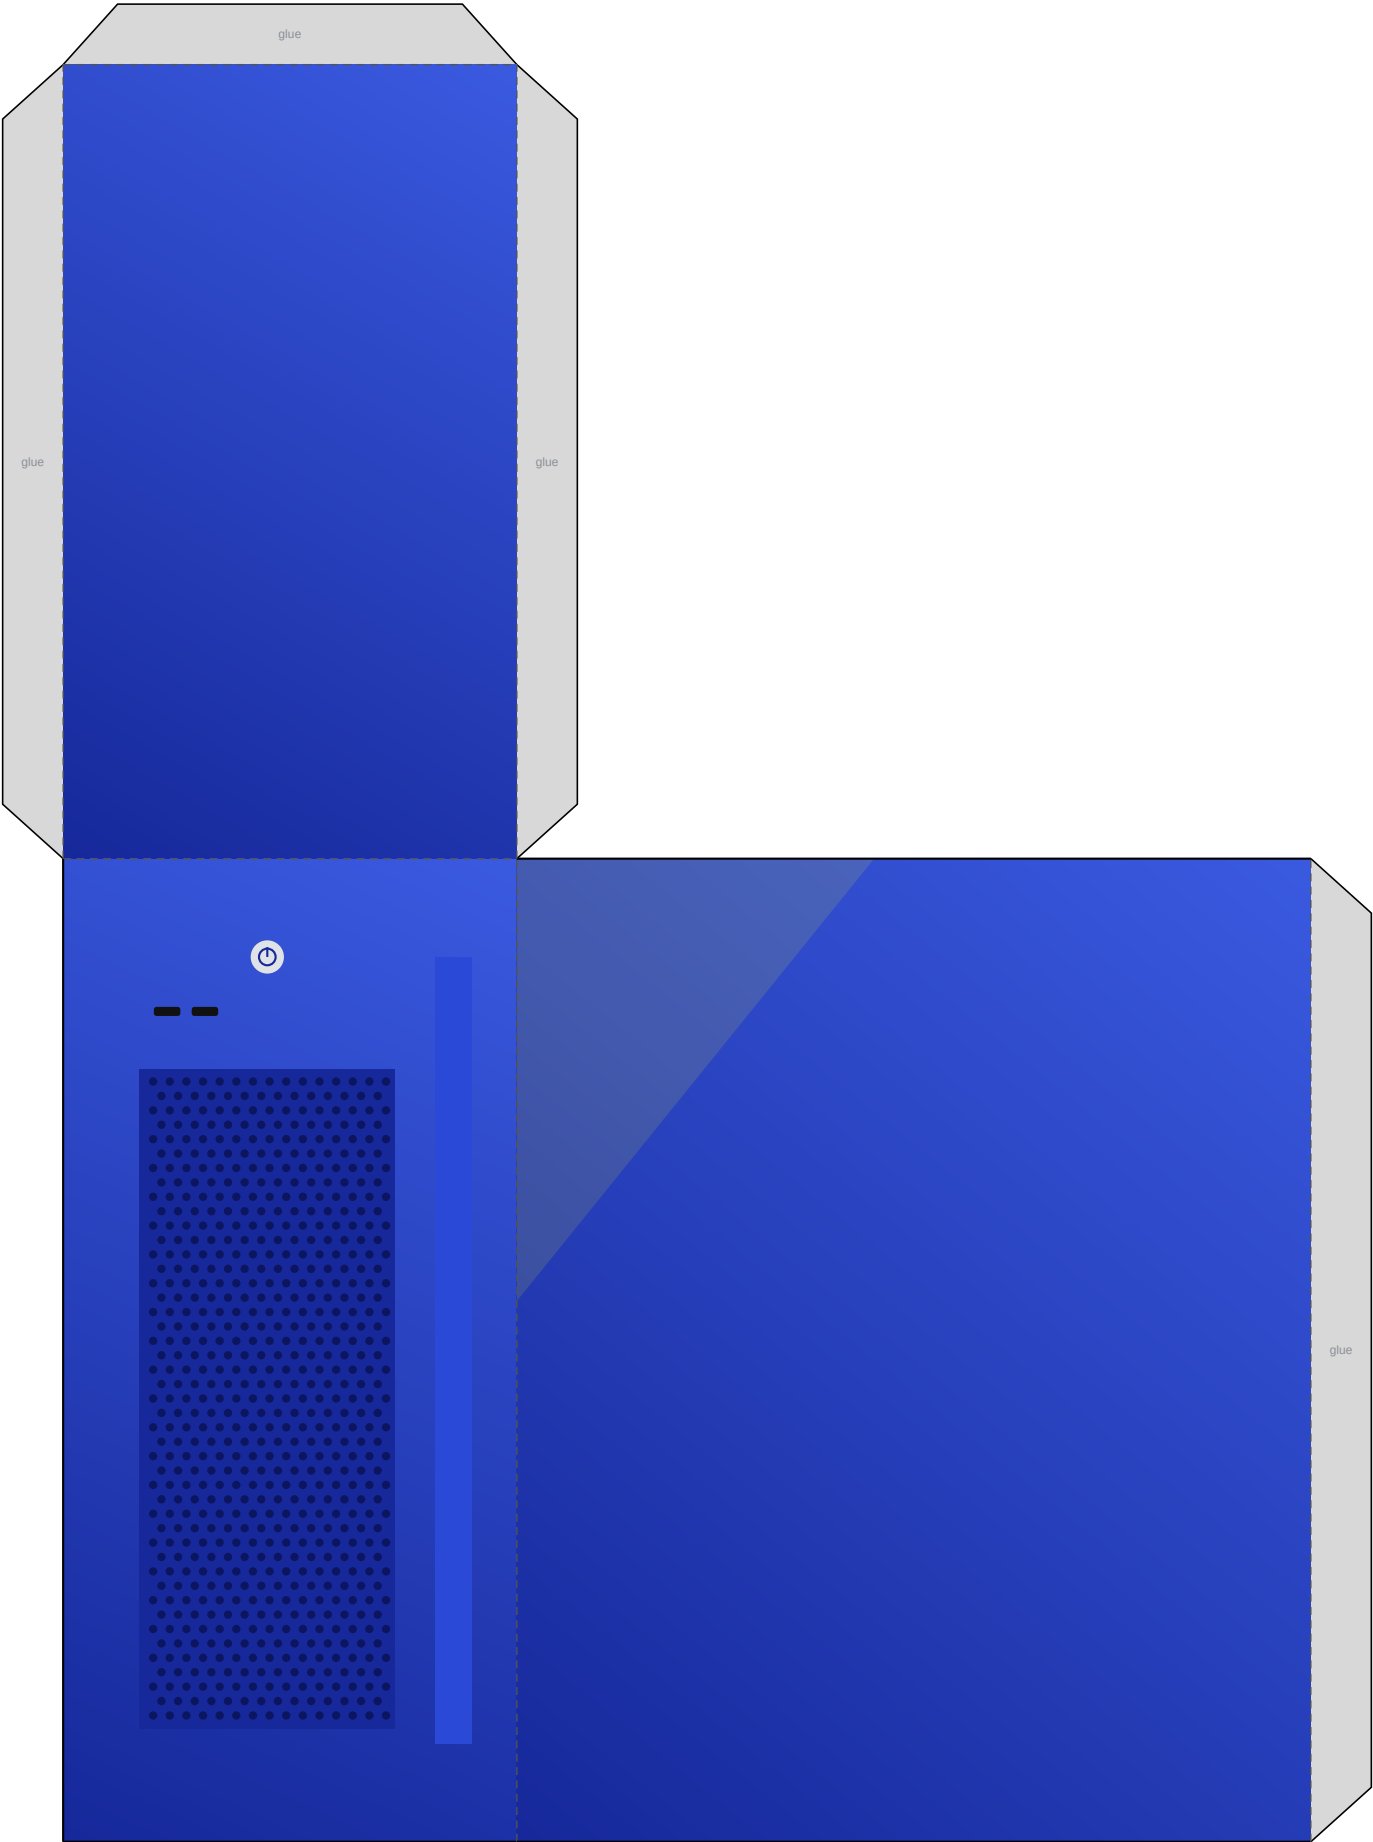

front (left half)

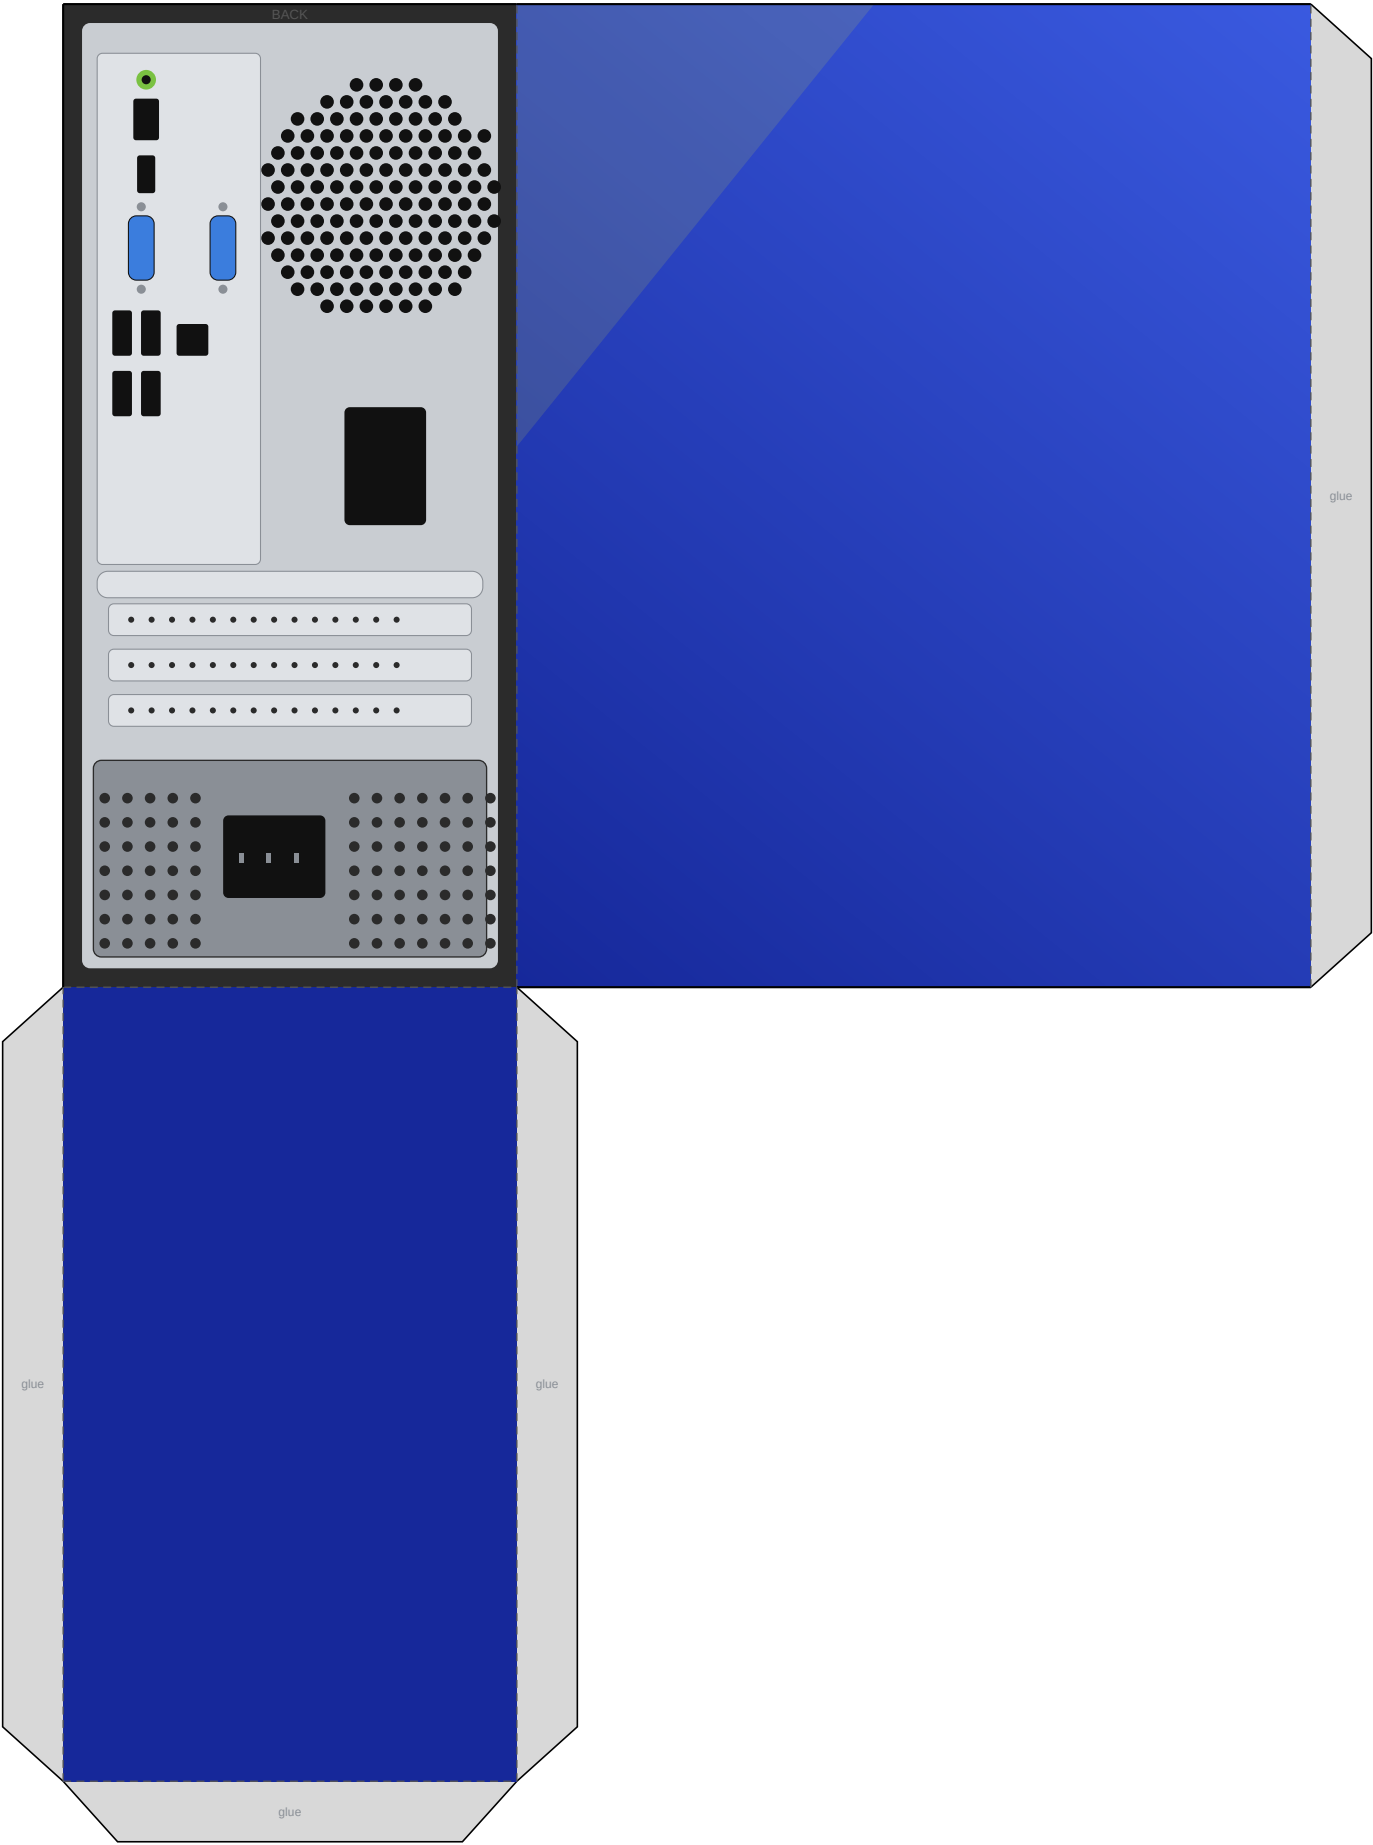

02a PC TOWER - piece A

Piece A = FRONT + RIGHT side + TOP. Size 6 x 10.5 x 13 cm.
The tab on the right side glues behind the left edge of piece B (back panel).
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.

02b PC TOWER - piece B

Piece B = BACK (ports panel) + LEFT side + BOTTOM.
Its side tab glues inside the left edge of the FRONT face (piece A).
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.

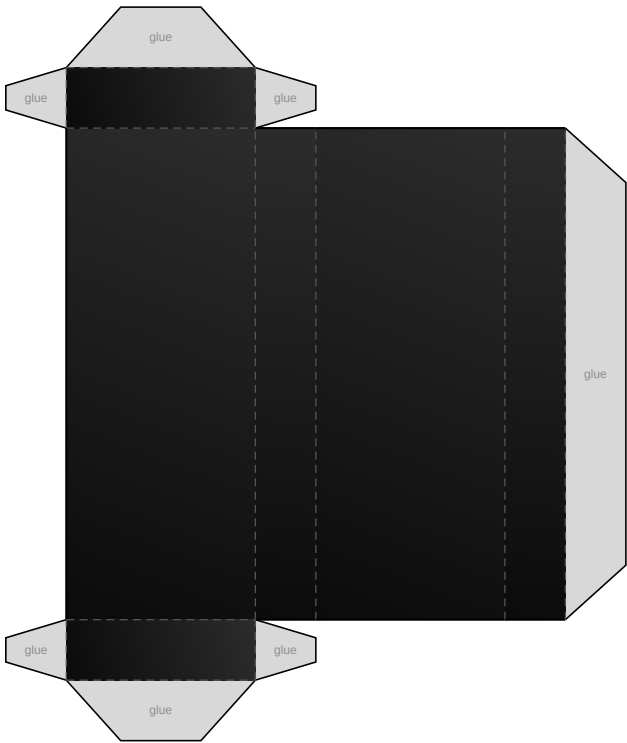

03 MONITOR screen box

Front = screen, the panel above it = monitor back. The thin black strips are the edges (0.8 cm).
Fold the 4 edges up, glue the small corner tabs, then fold the back down and glue on the 3 long tabs.
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.

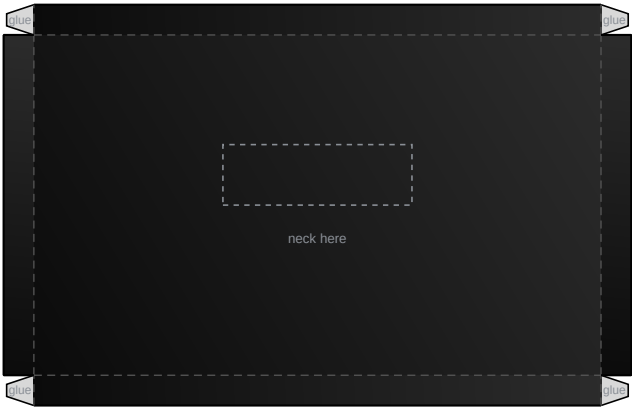

04 MONITOR STAND - neck + foot

Neck: 2.5 x 0.8 x 6.5 cm box. Foot: 7.5 x 4.5 cm, 0.4 cm high (open underneath).
Glue the neck's top half to the 'glue stand' mark on the monitor back; glue its bottom in the foot centre.
Tip: a strip of card or a lolly stick inside the neck makes it much stronger.
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.

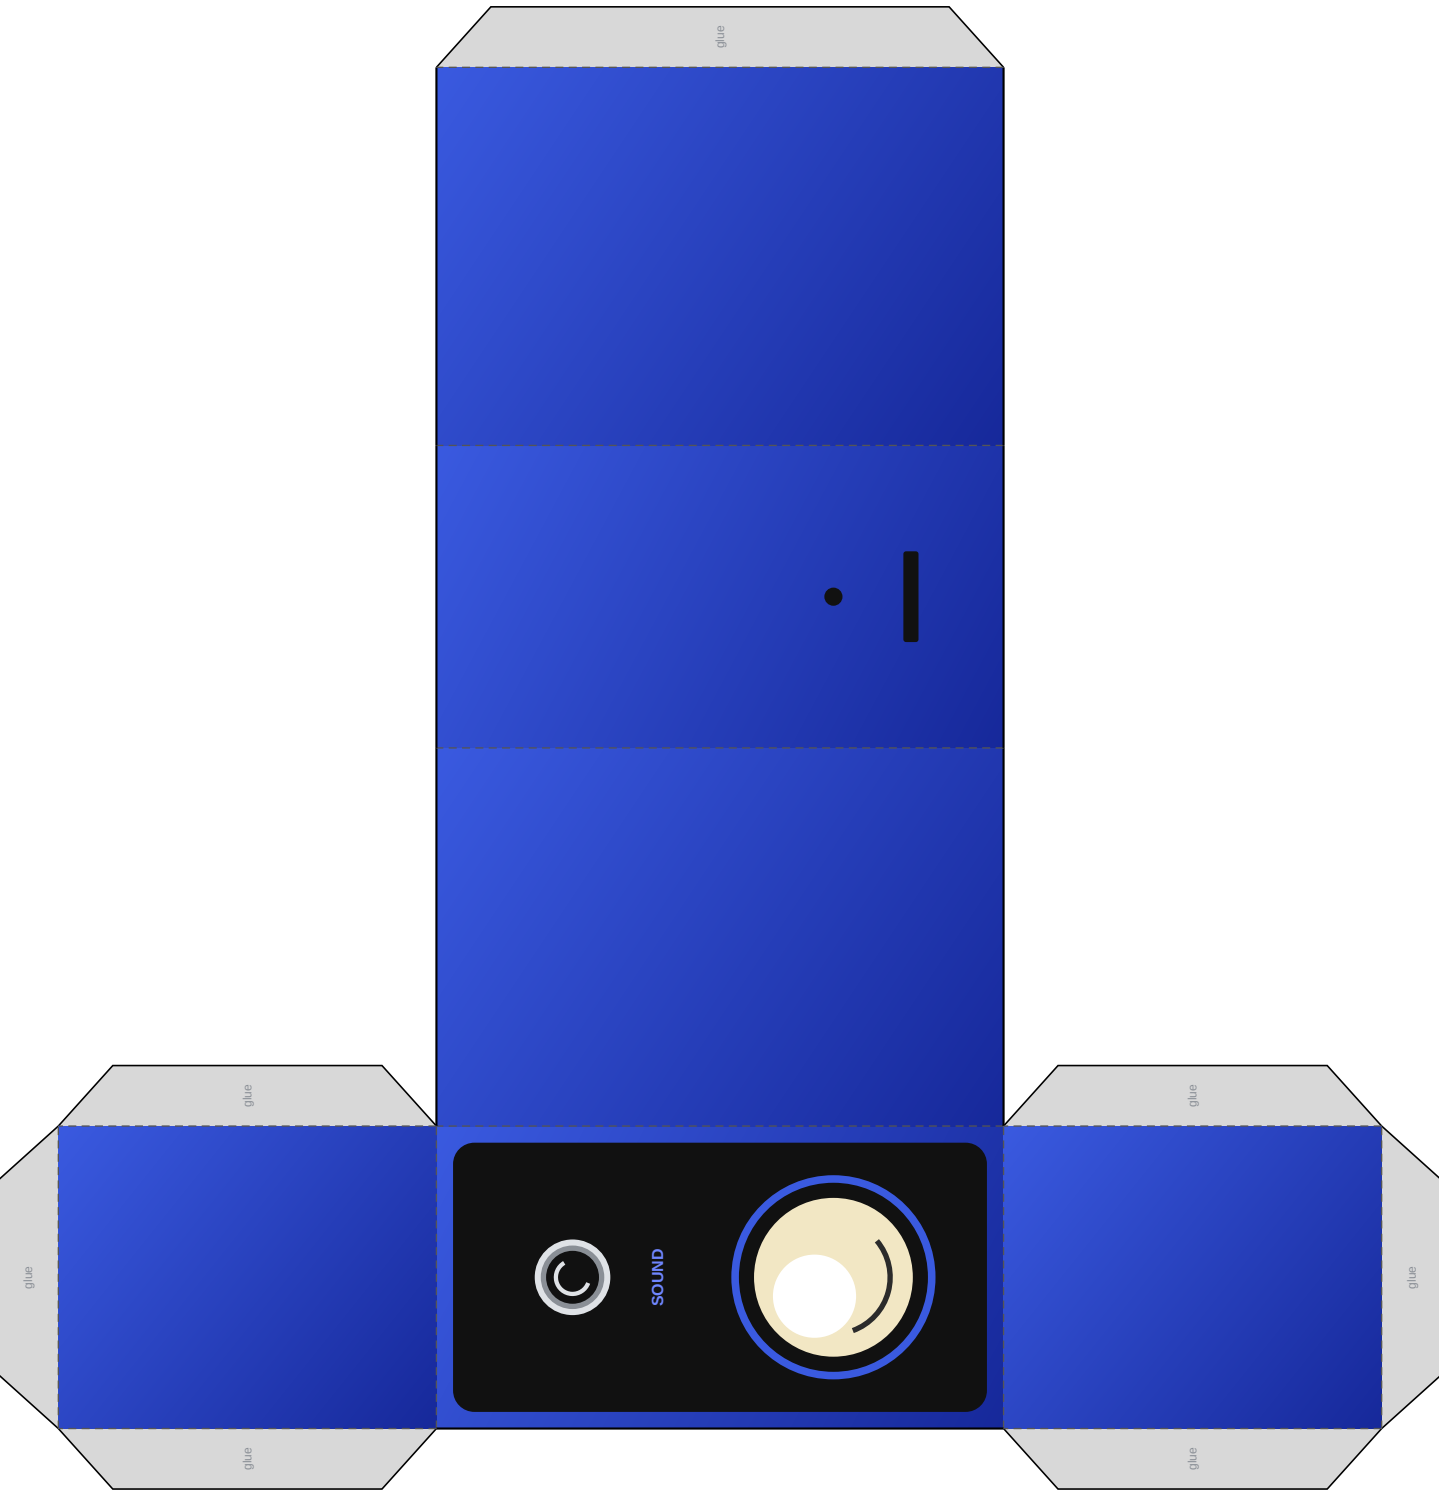

NECK

FOOT

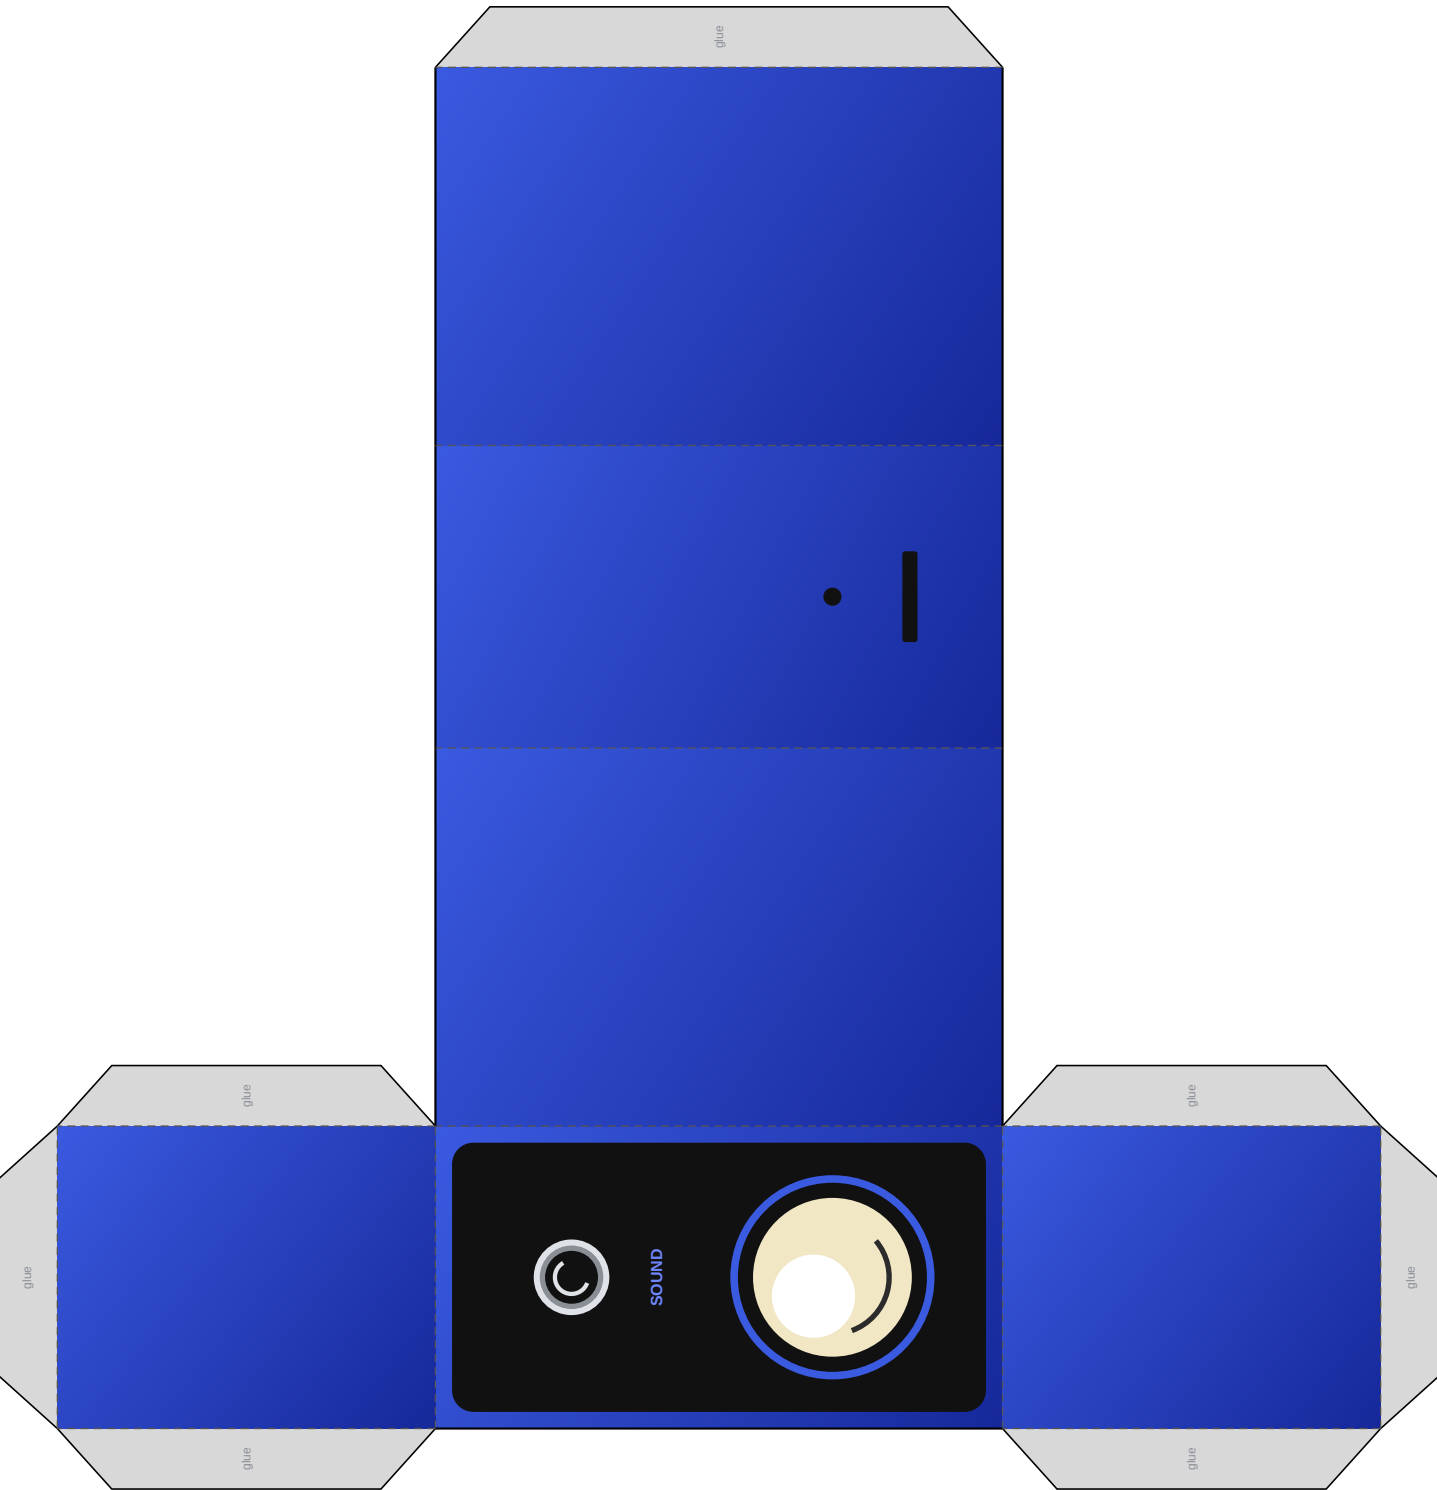

05 SPEAKER - LEFT

Box 4 W x 5 D x 7.5 H cm. Front = black panel with the round driver.
The net is printed sideways to fit the page.
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.

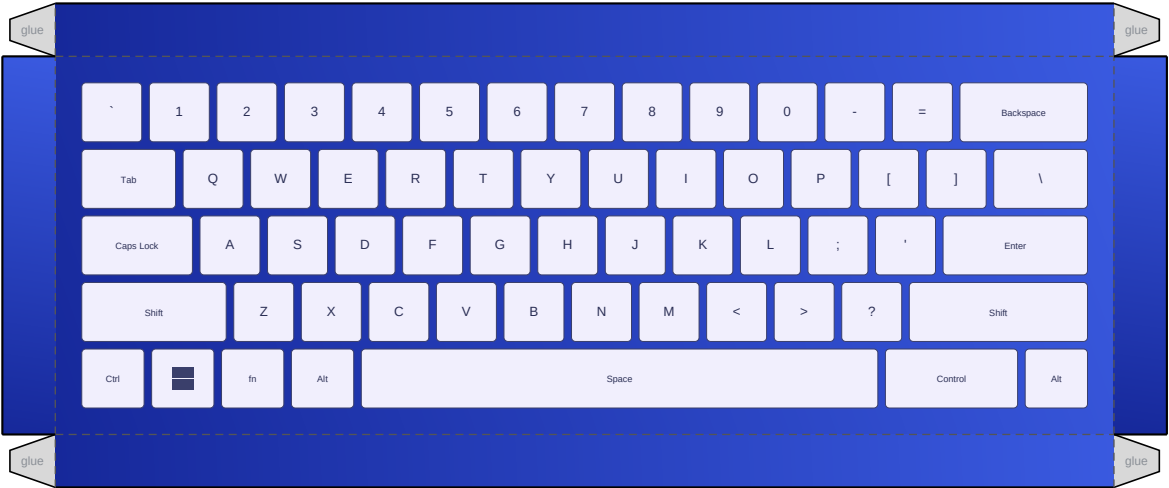

06 SPEAKER - RIGHT

Box 4 W x 5 D x 7.5 H cm. Front = black panel with the round driver.
The net is printed sideways to fit the page.
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.

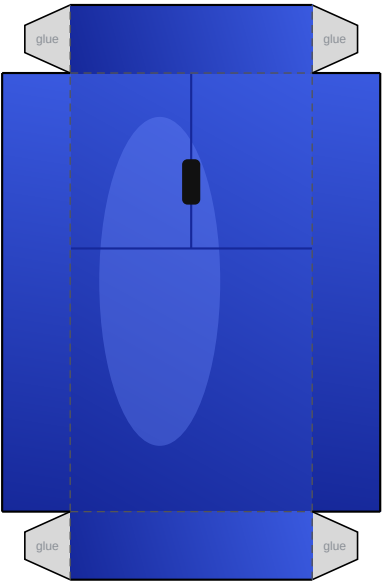

07 KEYBOARD + MOUSE

Both are open underneath: fold the walls down, glue the corner tabs inside the side walls.
Mouse tip: after gluing, gently bend the top so it looks rounded.
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.

KEYBOARD

MOUSE

08 OPTIONAL - RGB speaker fronts

Like the 3rd photo: cut these 2 panels and glue them over the speaker fronts.
Each panel is exactly 4 x 7.5 cm (same as the speaker front).
Print at 100 % / 'Actual size' (NOT 'Fit to page'). Use 160-220 g/m2 card or glue the print onto thin card.
